

Perspectives of Member States without nuclear power

Andreas Molin

Is there a common view?

Member States without nuclear power

- AT, CY, DK, EE, GR, I, IE, LV, LUX, MT, P, PL (Member States without reporting)

ENSREG based on consensus!!!

General Issues

- Equal footing
- Comprehensive and transparent risk and safety assessment
- Harmonized approaches – Peer Review
- Transboundary/regional participation
- Public engagement

„Safety Track“

Targeted reassessment of safety margins

- Consequences of any (other) initiating event, including indirect initiating events – e.g.
 - grid disturbance
 - forest fire
 - airplane crash
- Human and organisational factors

„Security Track“

- Physical protection
AND
robustness of plant
- Focus also on
 - cyber-crime
 - deliberate airplane crash

„Third Track“?

- „safety track“ and „security track“ contribute to a comprehensive risk and safety assessment – anything else?
- Off-site emergency preparedness is out of the scope of these stress tests

Thank You
